Course: Software Testing & Quality Assurance

Course Code: 442CCS

Academic Year: 2025 – 2026

Software Test Report – MySTC Mobile Application

Introduction

This test report documents the outcomes of the testing activities conducted on the MySTC mobile application. The purpose of this report is to summarize testing efforts, identify defects, and provide insight into the quality and stability of the application before release.

Abbreviations and Glossary:

- OK: Passed
- NOK: Not Passed
- UI: User Interface
- Bug ID: Reference number for reported defect
- SPC: Service Provider Center
- eSIM: Embedded SIM

References:

- Test Plan Document (MySTC)
- Test Case Sheet
- MySTC App User Manual

Overview of Test Results

Testing Environment:

- Device: iPhone 13 / Samsung Galaxy S21
- OS: iOS 17.1 / Android 13
- Network: Wi-Fi and 5G
- Testing Tools: Manual Testing

Success Rate Summary:

- Total Test Cases: 25
- Passed: 23
- Failed: 2
- Not Run: 0

Pass Rate: 90%

Fail Rate: 5%

Not Run: 5%

Environmental Impact:

All tests were run under stable internet conditions. A single Android-related crash was observed and documented.

Detailed Test Results

Test ID	Test Title	Final Decision	Notes	Bug ID
TC001	User Login	OK	Successfully logged in using valid credentials	-
TC002	Invalid Login Attempt	OK	Logo displayed correctly (note: server error occurred during submission)	-
TC003	Create New MyStc Account	OK	New account created and payment processed successfully	-
TC004	Reset forgotten password	OK	Password reset successful (note: some bills not displaying properly)	-
TC005	Check balance display	OK	Balance displayed correctly, invalid attempts blocked successfully	-
TC006	Recharge STC Balance	OK	Balance recharge completed successfully	-
TC007	View Balance and data usage	OK	Balance and data usage displayed correctly	-

TC008	Change mobile package in MySTC app	OK	Mobile package changed successfully	-
TC009	Request eSIM	OK	Learning mode activated successfully	-
TC0010	Activate Roaming Mode in MySTC App	OK	Roaming activated successfully on all supported networks	-
TC0011	Contacting Support	OK	Support connection established successfully	-
TC0012	Customer Support Rating	OK	Rating submitted successfully and appears in system	-
TC0013	Change App Language	OK	Language changed successfully without app restart	-
TC0014	About Notifications	NOK	Notifications not received on any test devices	BUG001
TC0015	Log Out from the App	OK	Logged out successfully	-
TC0016	Change Theme (Light/Dark Mod)	NOK	Theme change requires app restart	BUG002
TC0017	Locate Nearest STC Branch via Map	OK	Nearest SPC bench location displayed accurately with interactive markers	-
TC0018	Set Monthly Data Usage Limit	OK	Monthly data limit set successfully, with alerts at 80% of limit	-
TC0019	Download Bill as PDF	OK	Bill downloaded in PDF format with correct details (e.g., date, usage breakdown)	-
TC0020	Share Balance with Another Number	OK	Balance shared successfully, with instant confirmation on recipient's number	-
TC0021	View Transaction History	OK	Verify that the user can view previous transactions	-

			including payments and recharges.	
TC0022	Check Bill Details Breakdown	OK	Verify that the user can see the full details of their postpaid bill.	-
TC0023	Change Profile Information	OK	Verify that users can update personal profile info such as name or email.	-
TC0024	Enable Auto-Recharge	OK	Verify that the user can enable automatic balance recharge with selected amount and frequency.	-
TC0025	Report a Technical Issue (Support Ticket)	OK	Verify that the user can submit a technical issue through customer support.	-

Critical Dates

- Testing Start Date: Nov 3, 2025
- Planned Completion Date: Nov 25, 2025
- First Review Date: Nov15, 2025
- Final Submission Date: Nov 30, 2025

Recommendations

- Complaint Submission Issue: Investigate and resolve the server-side issue preventing users from submitting complaints.
- Billing History Display: Review and fix the inconsistency in the display of older bills for some users.
- Performance on Mobile Networks: Optimize the app to ensure better performance over 4G networks.

Conclusion

The test phase for the “my STC” application was largely successful, with most test cases passing and only a few minor defects found. The application is functional and secure, but requires some adjustments before final release. It is recommended that defects be resolved and a re-test be conducted prior to User Acceptance Testing (UAT).
